

## QUICK REVIEW

### How to use the Arc Angel Stun Cane™ and Big Stick™

1. Insert the Safety Key into the opening on the shaft.

2. Press the Arming Button and a Red Light will appear indicating that the device is activated.

3. Aim for the center of the assailant's chest, if possible.
4. Fire by simply pressing down the Firing Button.

**One second** of contact with the body will startle the attacker and cause some pain and a minor muscular contraction.

**Two seconds** of contact with the body will be felt as a strong blow to the body and is likely to cause brief muscle spasms and may initiate mental disorientation.

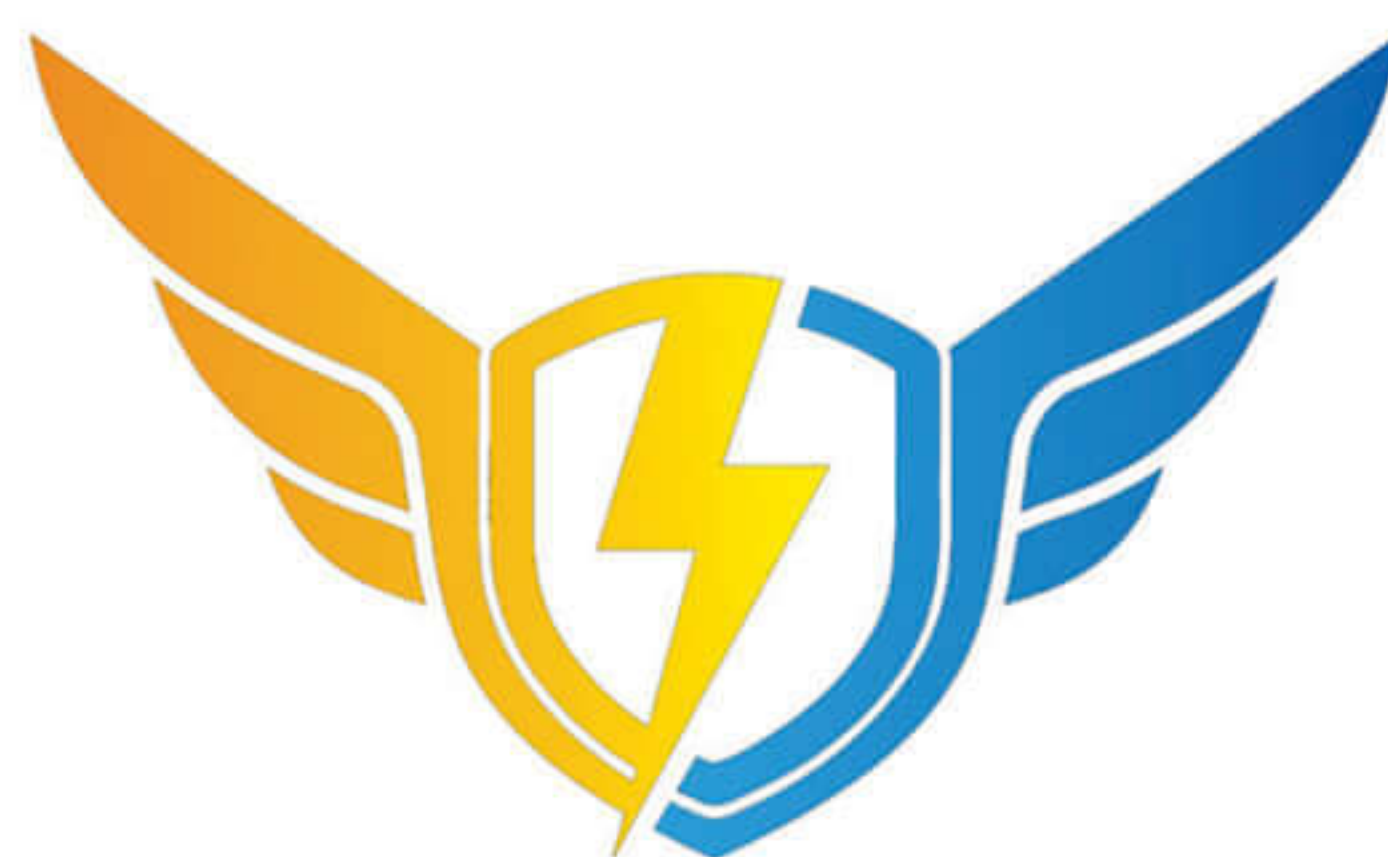

**Three seconds** of contact with the body may cause loss of balance and mental confusion plus neuromuscular dysfunction, temporarily disabling the attacker.

PROTECTING THE ONES YOU LOVE

All electrical conductive energy devices should be used responsibly, by adults, and should only be used in situations where the alternative would be to use other force measures which carry similar or higher degrees of risk.

## ARC ANGEL STUN CANE™ and BIG STICK™ USERS MANUAL IMPORTANT: READ BEFORE USING

The ARC ANGEL STUN CANE™ and Big Stick™ are defensive devices designed to neutralize an assailant from a safe distance, using non-lethal means. While the medical evidence strongly indicates that stun cane technology will not cause lasting after effects or fatality, it is important to remember that the nature of any physical confrontation involves risk. A physical confrontation can lead to someone being hurt due to unforeseen circumstances and individual susceptibilities.

## GENERAL WARNINGS

1. Never point the tip of the Arc Angel Stun Cane™ or Big Stick™ at another person unless intending to use it for self-defense.
2. Never aim the Arc Angel Stun Cane™ or Big Stick™ at the eyes or face.
3. Keep the Arc Angel Stun Cane™ and Big Stick™ out of the reach of children. The stun cane is intended for use by adults, 18 years of age or older.
4. In order to extend the life of the stun device, avoid dropping the unit and keep it dry.
5. Keep hands away from the tip of the unit at all times unless the Arming Button is in the 'OFF' position and the Safety Key (pin) is removed from the shaft.
6. For air travel, you must put the Arc Angel Stun Cane™ or Big Stick™ in your checked luggage; Store the Safety Key separate from the device, preferably on your person.
7. Do not turn on any electronic stun device near flammable liquids or fumes. Some self-defense sprays are flammable and dangerous to use in conjunction with stun devices.
8. The stun device could be unsafe to use in or near water because a stunned person could lose their balance or orientation and fall into the water in a condition of reduced body control.
9. When not intended for immediate use, always make certain that the Arming Button is in the 'OFF' position and that the Safety Key is removed.
10. Keep the battery charged. Test fire at least once a month to make sure the device is 'ready.'

SAVE THESE INSTRUCTIONS

The ARC ANGEL STUN CANE™ and Big Stick™ are classified as a Conductive Energy Devices (CED) and transmits an electronic 'bite' through surface-to-surface contact. The Arc Angel stun devices produce a high-voltage, low amp pulse that can briefly and safely immobilize or startle a person. CEDs use electrical outputs to temporarily interrupt or block the normal signals within the nerve fibers.

The Arc Angel stun devices brings traditional defense into the 21st Century by coupling age old defensive weapons – the cane and the stick – with modern electronic technology.

The Arc Angel Stun Cane™ and Big Stick™ can deter a person with bad intention by signaling, 'I'm not an easy target!' Both devices extend a person's reach, expand personal space, and create a buffer zone of safety. Sometimes, just firing the device can interrupt a hostile encounter by making a harsh, crackling sound and display of its bright electrical arc.

## USING THE ARC ANGEL STUN CANE™ and BIG STICK™

**CHARGE OVERNIGHT (8 HOURS) BEFORE FIRST USE.** Test fire once a month to make sure it is 'ready.' Keep it charged, keep it clean and dry, using a non-abrasive cloth.

The use of any defensive device may result in injuries such as gouging an eye, therefore, do not aim at the head or eyes. The Arc Angel Stun Cane™ and Big Stick™ are effective on most parts of the body, especially on places that have a lot of surface area, such as the chest, abdomen, groin or back.

PROTECTING THE ONES YOU LOVE

If you wear the lanyard around your wrist while the Safety Key is inserted into the shaft, anyone who grabs the cane away from you will also cause the Safety Key to be removed, thus disarming the device.

The active current travels only between the two electrodes located on the tip of the shaft and will not transmit from the target back to you.

**CAUTION:** Before adjusting the length of the shaft, always have the Safety Key removed and the Power Button in the safe or 'OFF' position and be sure the red LED light is out.
